Approximately 12:00 pm (r	noon): Take the four Dulcolax (Bisacody	(l) 5 mg tablets at one time.
	8 oz. every 10-15 minutes. Drink ½ of the Cish it in the morning. You may continue to d	
DAY OF THE PROCEDU	RE	
Approximately 6:00 am Finish the remainder of the the	Golytely. Drink 8 oz. every 10-15 minutes.	

Please note the more liquid you drink, the better your bowel prep will be. It is recommended that in addition to the bowel prep solution, you should try and drink at least 32 oz of some other fluid during the course of the prep. This can be done either during the times you are taking the bowel prep or after you have taken it. Any of the fluids listed in the clear liquids section are acceptable.

DISCONTINUE LIQUIDS FOUR HOURS PRIOR TO YOUR PROCEDURE.

Stop taking iron products 3 days prior to your procedure.

You may take blood pressure and heart medication on the morning of your procedure.

If you are Diabetic and on medication, please check with your doctor regarding special instructions.

Have someone available to drive you home due to the IV sedation.
